Rip Musc CDs to Audio Files

The screenshot displays the mediAvatar Audio Converter Pro interface. The main window shows a list of tracks from a CD titled 'Mozart Meets Cuba' by Cuba Percussion. The tracks are listed with their names, formats (cda), durations, and output sizes. The software is set to rip the tracks into APE format. The destination folder is 'D:\My Documents\My Music\meditation'. The interface includes a menu bar (File, Edit, View, Actions, Tools, Help), a toolbar with various icons, and a 'Profile' panel on the right with settings for file name, channels, and split options. A preview window at the bottom right shows a musical note icon and a progress bar.
